

MultiPlum dispenser systems

Accessibility is the key. And our dispenser systems are the answer. Skin care products must be available when needed. This is ensured with our flexible dispenser systems. They are available with space for one product - and some systems with place for two products in the same dispenser. This makes it easy to put together the right product choices for your specific needs. All dispenser systems are available in various sizes and shapes.

The products for the MultiPlum line are delivered in environmentally correct and airtight bags, which are easy to refill.

MultiPlum is the ideal solution for the industry, repair shops, the food industry, workmen i.a.

Dispensers
