Safety

Welcome to Plum Safety

We are international experts and offer high quality products and expert knowledge within first aid solutions and hygiene for the workplace.

We want you to be safe at work!

WORKPLACE HYGIENE & FIRST AID

Accidents happen every day. Minimize the extent and impact by making sure you have the right first aid solutions available where accidents can happen.

A first aid solution tailored to your workplace will help you prepare for accidents and quickly treat eye injuries, cuts and minor wounds in a safe and hygienic way.

A wide range of eyewash, plasters, decontamination solutions, burn gel, and wound cleansing wipes, helps to quickly treat you or your colleague and minimize the damage of an accident.

It is essential that the mix of safety products is fitted to the requirements of your workplace.

GLOBAL FOOTPRINT

We have a global footprint and are represented in most of the world. Reach out if you need us to help you find your safety supplier!

Protect your people Equip your facility right

Quick and easy access to first aid will limit the impact of accidents and keep your workplace safe

Accidents happen every day. Minimize the extent and impact by making sure you have the right first aid solutions available where accidents can happen. A first aid solution tailored to your workplace will help you prepare for accidents and quickly treat eye injuries, cuts and minor wounds in a safe and hygienic way.

QUICK AND EFFECTIVE HELP TAILORED TO YOUR BUSINESS

A wide range of eyewash, plasters, burn gel and wound cleansing wipes, helps to quickly treat you or your colleague and minimize the damage of an accident. It is essential that the mix of safety products is fitted to the requirements of your workplace.

We will help you find the right solution, whether you work in an office or handle acids or alkali in a high-risk environment like charging batteries, industrial cleaning, laboratory work or petrochemical industry.

PRACTICAL SOLUTIONS FOR BUSY WORKING DAYS

Your hands, your eyes and your head are your most important working tools. Even a small incident can affect your work, and larger ones may cause an even greater impact if you are not prepared. By taking the correct precautions, you enable yourself to have the right first aid within reach, whereby many smaller everyday accidents can be minimized significantly.

Plum Eyewash is easy to use if an accident happens

Turn the eyecup in the direction of the arrow 360° until the seal breaks

Lean back, squeeze the bottle gently and rinse

Or lean forward and rinse by squeezing the bottle gently

The green Plum Eyewash helps you remove dirt and foreign objects

The soft bottles are easy to handle and rinse the eye with a soft and even flow

Clear pictograms and symbols show how to store and handle the bottle

The ergonomic soft plastic eyecup is shaped to fit the curve of the eye. Squeeze it together before putting it to your eye. The cup helps keep the eye open and provide the best possible flow of liquid and rinsing time

The blue Plum pH Neutral provides immediate first aid in case of serious accidents involving acids and alkali

Clear instructions for use

Economic and a long shelf-life of 3,5 years. The expiry date is clearly shown on the front of the label

Quick and easy to open. A single turn breaks the seal and you are ready to rinse

With the ergonomic DUO eyecup, both eyes can be rinsed at the same time. The cup helps keep the eyes open and provide the best possible flow of liquid and rinsing time

Quickly accessible eyewash solutions

Quick access to eyewash is crucial for all workplaces with a risk of eye injuries, because seconds decide the impact of an accident

YOU ONLY HAVE TWO EYES – TAKE CARE OF THEM

Your eyesight is one of the most important senses. So, take care of your eyes. Accidents can happen no matter how careful you are. Stay prepared for accidents with the right first aid at the right place. An eyewash solution placed in high risk areas is the best preparation for eye injuries.

A WIDE RANGE OF UNIQUE RINSING SOLUTIONS

Our top priority is to help you get a safer place to work, and our concepts are developed in close collaboration with skilled eye specialists. This means that the products have been thought through down to the smallest detail. They are easy to use with clear pictograms that show you the correct use. The eyecup helps keep the eye open. The rinsing liquid hits the eye in the right place and with the right amount in a soft and even flow.

The products are CE marked according to the Guidelines for Classification of Medical Device Directive (MDD 93/42/EEC)

How to choose the correct eyewash

When it comes to eye accidents, the harmful substance varies and you need to choose the right eyewash accordingly

The cause of an accident determines which eyewash is required. When an accident occurs, it is essential to determine whether it is caused by either a foreign object or by acids or alkali - and if possible, which pH value the substance in question holds.

Know your chemicals and ensure the best suited first aid.

An eyewash plan helps you choose the right eyewash by clear guidelines. Place the eyewash plan next to the eyewash stations, boxes and QuickSafe®.

Art.nr. 956480B Dimensions: W: 22,8 x H: 29,0 cm

The pH scale ranges from 0 to 14 and measures how acidic or alkaline a substance is.

- A pH of 7 is neutral
- A pH less than 7 is acidic
- A pH greater than 7 is alkaline

When pH is either strongly acidic or alkaline, start by rinsing with Plum pH Neutral until the bottle is empty. Discard the bottle and rinse with Plum Eyewash until you reach a doctor or the emergency room.

When pH is neutral, rinse with Plum Eyewash until the bottle is empty and discard the bottle after use.

145 cm

QR-code: How to use Plum Eyewash (animation video)

QR-code: How to use Plum Eyewash DUO (animation video)

Mount the eyewash plan on the wall next to the eyewash station. Mark off 145 cm from the floor and place the eyewash plan according to the mark.

This is a detailed infographic for Plum Safety eyewash. It features a vertical pH scale from 0 to 14, with 7 being neutral. The scale is color-coded: blue for acidic (pH 0-7) and green for alkaline (pH 7-14). To the right of the scale are five rows of five-step instructions (numbered 1-5) for using different eyewash products based on the pH of the substance. The instructions include diagrams of a person using the eyewash. At the bottom, there are two QR codes linking to animation videos for 'How to use Plum Eyewash' and 'How to use Plum Eyewash DUO'. A measurement line indicates that the plan should be mounted 145 cm from the floor. The Plum Safety logo and website are at the top right.

Rinse both eyes simultaneously

You no longer have to choose which eye to save. Plum DUO eyecup is a unique solution and allows you to rinse both eyes at the same time and save them both

MANY ACCIDENTS AFFECT BOTH EYES

Eye accidents involving chemicals often affect both eyes. A DUO eyecup helps you prepare, because it allows rinsing of both eyes at the same time. Stop worrying about which eye to save, save them both at once instead.

EYECUP FOR OPTIMAL RINSING

Apart from the strength of the acid or alkali, the contact time is the most critical factor in accidents involving acids and alkali. It is key that the available first aid neutralize the harmful substance as quickly as possible. With the unique DUO eyecup, you can treat both eyes at the same time.

The eyecup is shaped to help you keep your eyes open during rinsing and ensure the correct flow of liquid and rinsing time.

Plum Eyewash and Plum pH Neutral are disposable products, which ensure that the rinsing liquid is sterile every time

Eyewash in case of foreign objects

Plum Eyewash eases discomfort and prevents following complications caused by foreign bodies in the eyes

You can easily get a foreign object in your eye. Dirt, dust, cleaning agents or paint from your hands all pose a risk for your eyes. The risk increases when working with machines and tools that can cause wood or metal splinters in your eyes.

Getting a foreign body in your eye can be extremely unpleasant, as the eye is highly sensitive. Without treatment, it can develop into an inflammation of the eye, cornea or iris. By rinsing immediately after the incident, you can prevent this and decrease the risk of following complications.

Plum Eyewash contains a sterile saline solution of 0.9% sodium chloride, which is similar to the eye's natural fluid. Squeeze the bottle gently to generate a soft and pleasant flow. The eyewash product range includes everything from a small handy bottle that you can carry with you, to wall-mounted stations that makes it quick and easy to get help in case of an emergency.

**200 ML / 500 ML / 1000 ML
PLUM EYEWASH**
Bottles with a 0.9% sterile sodium chloride solution. The bottles can be used individually or as refills in eyewash stations and boxes. They come with a dust cap. The 200 ml bottle is easy to store in the specially designed belt bag, in the first aid kit, in the toolbox, etc.

Eyewash in case of chemical accidents

Plum pH Neutral
neutralizes acids and
alkali and quickly flush
them from the eye
during rinsing

IMPORTANT

Reservation is made for
hydrofluoric acid, which is toxic
and highly corrosive to skin and
bones.

Plum pH Neutral and Plum Eyewash
may neutralize and rinse, but not
limit the corrosive effect.
They are not intended as first aid for
eye accidents involving hydrofluoric
acid.

RECOMMENDED USE OF PLUM PH NEUTRAL

Plum pH Neutral is an eyewash
solution for accidents involving
acids and alkali.
Rinse with Plum pH Neutral to
reduce the pH value of the harmful
substance to a harmless level as
quickly as possible.
Continue rinsing with Plum Eyewash
0.9% sodium chloride until you
reach a doctor or emergency room.

DANGEROUS CHEMICALS ARE EVERYWHERE

In many jobs, businesses and industries, there is a risk of being exposed to serious eye injuries caused by chemicals e.g. in chemical factories, the recycling industry, on construction sites and in the mining industry. You need a neutralizing eyewash to minimize the impact of the accident.

Acids and alkali can break down the structure of skin and mucosa membranes. The severity of corrosion injuries depends primarily on:

- The concentration of the chemical
Strong acids and alkali are extremely corrosive
- The temperature
A high temperature increases the corrosive properties of the chemical
- The duration of contact
The longer the duration, the deeper the harmful substance will penetrate

A FEW SECONDS CAN MAKE THE DIFFERENCE

In case of eye injuries involving acids and alkali, it is crucial to neutralize the chemical as quickly as possible to a pH level of approximately 7.4, corresponding to the normal pH level of the eye's fluid - before the acid or alkali has penetrated the cornea.

To optimize safety where there is a risk of acid and alkali injuries, the eyewash solution must be:

- Easily accessible
- Quick to use
- Effective

QUICK AND EFFECTIVE EYEWASH IS KEY

Plum pH Neutral is a 4.9% phosphate buffer that will quickly and effectively neutralize even strong acids and alkali. The liquid consists of phosphate salts that are present in the body. The hydrogen phosphate buffer is effective against acids, whereas the dihydrogen phosphate buffer reacts against alkali. The effect of Plum pH Neutral has been documented in scientific studies.^{1) 2)}

We have tested the neutralizing effect of Plum pH Neutral for both strong acids and alkali compared with the effect of saline eyewash with 0.9% sodium chloride. The test clearly shows that Plum pH Neutral will quickly neutralize both acids and alkali to a harmless pH level. Saline eyewash dilutes the liquid, but only small changes to the pH value are obtained (Figure 1).

200 ML
PLUM PH NEUTRAL
SINGLE CARTON

Bottles with a 4.9% sterile phosphate buffer solution that quickly neutralizes acids and alkali. They can be used individually or as refills in eyewash stations and boxes.

Single carton with 200 ml Plum pH Neutral. The carton protects the bottle and is suitable for refilling stations and for mobile workplaces.

Content: 200 ml
Packaging: 10 x 200 ml
Article no: 4755

200 ML
PLUM PH NEUTRAL

The 200 ml bottle is easy to carry in the specially designed belt bag, in the first aid box, in the toolbox, etc. Delivered with dust cap.

Content: 200 ml
Packaging: 10 x 200 ml
Article no: 4752

500 ML
PLUM PH NEUTRAL DUO

The 500 ml bottle comes with the ergonomic DUO eyecup, which makes it possible to rinse both eyes at the same time.

Content: 500 ml
Packaging: 6 x 500 ml
Article no: 4801

BELT BAG
FOR 200 ML BOTTLES

Carry your eyewash in this practical bag for your belt, work clothes, etc.

The bag is easy to open and provides quick first aid in case of accidents. A safe and hygienic way to store and protect the bottle. Bottle is not included.

Content: -
Packaging: 10 units
Article no: 4692

ACCIDENTS INVOLVING ACIDS AND ALKALI WILL HAPPEN WHEN YOU LEAST EXPECT THEM

Plum pH Neutral DUO saved the eyesight of a SITA France employee. They handle plastic waste like plastic bottles with cleaning detergents. The liquid from a cleaning bottle went into both employee's eyes. Thanks to Plum pH Neutral DUO, the harmful substance was neutralized, and the employee was already back at work the next day.

Plum Wound and Eyewash Sprays are portable, easy to use and saline-based sprays. They work at any angle and provide a balanced and soft flow rate. Ideal for the industrial sector, production industry, laboratories, transport of dangerous goods, first responders, law enforcement, firefighters, military and first rescue services.

Wound & Eyewash Spray

Quick and easy to use within seconds
- for skin and eyes!

Gentle wound and eyewash spray used for minor accidents like cuts and scrapes on the skin or rinsing dust and dirt from wounds and eyes. The wound and eyewash spray is available in a saline solution and a phosphate buffered saline solution. They offer safe rinsing with a quick and easy single hand operation. The dust cap protects the spray nozzle from contamination, the spray is suitable for multiple use and the can is fully recyclable.

A quick and easy solution that minimizes the risk of further infection or damage.

Cleanse the nozzle before use by briefly spraying in the air. Place the nozzle minimum 10 cm from the wound or eye. Press the nozzle and spray. Avoid letting the nozzle touch the wound or the eye.

50 ML / 250 ML WOUND AND EYEWASH SPRAY
A 0.9% sodium chloride solution that gives immediate care to minor accidents such as cuts and scrapes on the skin or dust and dirt in the eyes. Helps minimize the risk of further infection or damage.

Wound and Eyewash Spray

Article no: 4554
Wall bracket: 4123

200 ML WOUND AND EYEWASH BUFFER SPRAY
A 0.9% phosphate buffered sodium chloride solution for rinsing away dust and dirt from wounds and eyes. Wound healing is supported by this saline spray, which mechanically removes foreign bodies, reduces pathogens, as well as blood, clot and dead tissue and moistening the tissue in the process.

Wound and Eyewash Buffer Spray
Content: 200 ml
Packaging: 12 x 200 ml
Article no: 4556
Wall bracket: 4123

200 ML / 250 ML WALL BRACKET
Make your first aid visible by mounting the Wound and Eyewash Spray cans on the wall. This simple wall bracket will save you minutes if a minor eye injury or damages on the skin occur. Then you do not have to search for your Wound and Eyewash Spray but it will be close at hand.

Bracket for 200 ml and 250 ml spray
Content: 1
Packaging: 24 pcs
Article no: 4123

Product benefits

- Sterile until empty - allows repeated use
- Quick and easy single hand operation
- Safe rinsing
- Dust cap to protect the spray nozzle from contamination
- Easy to transport, classed as a non-flammable aerosol
- Up to 100% product emptying
- The can is fully recyclable
- Hypoallergenic
- Sterile solution without preservatives
- Shelf-life of 3 years
- Expiry date on the bottom of the can

Open eyewash stations

An open wall-mounted solution gives a good overview and quick and easy access to first aid

PROTECT YOUR COLLEAGUES, MAKE FIRST AID AVAILABLE

When an accident has happened, it is too late to look for help in a box or in a cupboard.

Systematize first aid with a wall-mounted station and make it easy to access when an accident happens. Choose between open wall stations and box solutions. The latter are particularly suitable for dusty work environments to protect the bottles and avoid adding more dust to an accident.

Make sure to have additional bottles at hand so that rinsing can continue on the way to further treatment.

EASY TO MOUNT

All wall stations are easy to mount and are delivered with pictograms that clearly shows how to use the products.

PLUM COMBI-STATION

Wall station with 200 ml Plum pH Neutral and 500 ml Plum Eyewash. Particularly suitable for places where there is a risk of getting both foreign bodies and acids and alkali in the eyes.

Packaging:	1
Article no:	4770
Dimensions:	
Eyewash plan	h: 29 x w: 22,8 cm
Mounting plate	h: 29 x w: 22,8 cm

PLUM COMBI-STATION DUO

Wall station with 500 ml Plum pH Neutral DUO and 1000 ml Plum Eyewash DUO. Particularly suitable for places where there is a risk of getting both foreign bodies and acids and alkali in the eyes and where there is a risk that both eyes will be affected.

Packaging:	1
Article no:	4803
Dimensions:	
Eyewash plan	h: 29 x w: 22,8 cm
Mounting plate	h: 29 x w: 22,8 cm

PLUM EYEWASH STATION

Wall station with 500 ml Plum Eyewash. Particularly suitable for small and mobile workplaces.

Packaging:	1
Article no:	4611
Dimensions:	
Eyewash plan	h: 29 x w: 22,8 cm
Mounting plate	h: 29 x w: 13,5 cm

PLUM EYEWASH STATION DUO

Wall station with 1000 ml Plum Eyewash DUO. Particularly suitable for small and mobile workplaces where prolonged rinsing of both eyes may be required.

Packaging:	1
Article no:	4802
Dimensions:	
Eyewash plan	h: 29 x w: 22,8 cm
Mounting plate	h: 29 x w: 13,5 cm

PLUM EYEWASH STATION

Wall station with 2 x 500 ml Plum Eyewash. Particularly suitable for environments and small workplaces that are not dirty, but where there is a risk of getting foreign bodies into the eyes.

Packaging:	1
Article no:	4694
Dimensions:	
Eyewash plan	h: 29 x w: 22,8 cm
Mounting plate	h: 29 x w: 22,8 cm

PLUM EYEWASH STATION MAXI

Wall station with 2 x 1000 ml Plum Eyewash. Particularly suitable for places where prolonged rinsing may be required.

Packaging:	1
Article no:	4708
Dimensions:	
Eyewash plan	h: 29 x w: 22,8 cm
Mounting plate	h: 29 x w: 22,8 cm

Dust-proof eyewash box

A closed station protects your first aid equipment from dirt and dust and keeps the products ready for use

PLUM COMBI-BOX
Dust-proof eyewash box with 200 ml pH Neutral and 500 ml Plum Eyewash. Suitable for places where there is a risk of getting both foreign bodies and acids and alkali in the eye.

Packaging: 1
Article no: 4789
Dimensions:
Eyewash plan h: 29 x w: 22,8 cm
Eyewash box h: 28 x w: 23 x d: 11 cm

REDUCE IMPACT WITH COMBINED RISING
Combined rinsing is recommended in case of accidents involving acids and alkali – first with Plum pH Neutral, then with Plum Eyewash. A combi-box holds both products and gives quick and easy access. Start by neutralizing the acid or alkali with Plum pH Neutral, continue rinsing with Plum Eyewash until you reach a doctor or the emergency room.

If you work mostly with liquid chemicals, we recommend Plum pH Neutral DUO. That way you can rinse both eyes at the same time in case of an emergency.

We recommend the open stations for environments without dust and dirt, such as laboratories. The closed stations protect the products in dusty environments. All stations are easy to mount and come with a mirror and pictograms clearly indicating how to use the eyewash bottles.

PLUM EYEWASH BOX
Dust-proof eyewash box with 2 x 500 ml Plum Eyewash. Particularly suitable for dusty environments and small workplaces, with a risk of getting foreign bodies into the eyes.

Packaging: 1
Article no: 4650
Dimensions:
Eyewash plan h: 29 x w: 22,8 cm
Eyewash box h: 28 x w: 23 x d: 11 cm

PLUM COMBI-BOX DUO
Dust-proof eyewash box with 500 ml Plum pH Neutral DUO and 500 ml Plum Eyewash DUO. Particularly suitable for places with a risk of getting both foreign bodies and acids and alkali in the eyes and where there is a risk that both eyes will be affected.

Packaging: 1
Article no: 4862
Dimensions:
Eyewash plan h: 29 x w: 22,8 cm
Eyewash box h: 28 x w: 23 x d: 11 cm

PLUM COMBI-BOX DUO MAXI
Dust-proof eyewash box with 500 ml Plum pH Neutral DUO and 1000 ml Plum Eyewash DUO. Particularly suitable for places with a risk of getting both foreign bodies and acids and alkali in the eyes and where there is a risk that both eyes will be affected.

Packaging: 1
Article no: 4810
Dimensions:
Eyewash plan h: 29 x w: 22,8 cm
Eyewash box h: 35,7 x w: 25,2 x d: 11,6 cm

PLUM EYEWASH BOX DUO MAXI
Dust-proof eyewash box with 2 x 1000 ml Plum Eyewash DUO. Particularly suitable for places where prolonged rinsing may be required.

Packaging: 1
Article no: 4816
Dimensions:
Eyewash plan h: 29 x w: 22,8 cm
Eyewash box h: 35,7 x w: 25,2 x d: 11,6 cm

PLUM EYEWASH PLUG & HEAT BOX, SMALL
Dust-proof eyewash box with a heating element. Ensures the eyewash liquid has a comfortable shower temperature. Suitable for 2 bottles of 200 ml and/or 500 ml Plum Eyewash or pH Neutral. No content.

Packaging: 1
Article no: 4672
Dimensions:
Eyewash plan h: 29 x w: 22,8 cm
Eyewash box h: 28 x w: 23 x d: 11 cm

ENSURE THE RIGHT TEMPERATURE

Whatever the reason, most often quick help is needed when you get something in the eye. Therefore, preparedness must be in place and be easily accessible at the workplace – also under cold weather conditions.

For fast and effective decontamination of bodies and surfaces in contact with corrosive and toxic hazardous substances such as strong acids and bases, oxidants, formaldehyde, phenols, organic solvents, hydrofluoric acid, and fluorides.

Plum BodyNeutrAll

Mobile body shower with a highly effective decontamination solution for skin, surfaces and clothing.

Plum BodyNeutrAll contains ascorbic acid, an amino acid buffer, and calcium ions as active substances. Glycerin, polyethylene and glycol are solubilizers for organic chemicals.

PLUM BODYNEUTRALL:

- ✓ reduces strong oxidants (such as chlorine, hypochlorite, chlorine dioxide, chloramine, bromine, iodine, fluorine, hydrogen peroxide, peracetic acid) to compounds that are no longer active.
- ✓ binds aldehydes into imines, phenols into amines, and heavy metals into ammine complexes.
- ✓ binds hydrofluoric acid and fluorides into the sparingly soluble calcium fluoride.
- ✓ dissolves organic solvents and chemicals.

PERMITS / APPROVALS OF THE DECONTAMINATION SOLUTION:

- Certification as a class I medical device, according to the requirements of the EU Regulation EU 2017/745.
- Officially registered by the Federal Office for Drugs and Medical Devices under the number DE/CA33/ILM/2020/1. The registration is valid for the entire EU and may be marked with the CE mark accordingly.
- Conforms to DIN 14555-12 for hazardous goods equipment trolley.

PLUM BODYNEUTRALL 5 L
5 L empty sprayer which comes with a canister of mixed liquied to fill in the sprayer. This is suitable for larger areas up to 50 m² and covers several people.

Packaging:	1
Article no:	4735
Dimensions:	
Sprayer	h: 57 (with lance: 80) x w: 22 cm Ø18 cm

PLUM BODYNEUTRALL 100 ML
Mixed, pocket-sized bottle to bring along and it covers approx. 1 m² or 1 arm's length.

Packaging:	6
Article no:	4737
Dimensions:	h: 13 x w: 6.5 x d: 3.1 cm

PLUM BODYNEUTRALL 600 ML
2 bottles of 300 ml to be mixed and used with a sprayhead. Easy to use on smaller areas up to 6 m² or up to 3 persons.

Packaging:	4
Article no:	4736
Dimensions:	
2 bottles with sprayhead	h: 29 x w: 11 x d: 6 cm

C-GEL 30 G
Prevents the effect of toxic fluorides on the skin in case of contamination with hydrofluoric acid. Simplified application in an emergency - can also be used with gloves - due to the pressure dispenser.

Packaging:	8
Article no:	4738

QuickFix

QUICKFIX IS A UNIQUE DISPENSER:

- Immediate and visible access to plasters and eyewash ampoules
- Each plaster is ready for use with a pull from the dispenser
- Each plaster is packed separately
- Only one hand is needed to apply
- Easily refilled as required
- Easy to see when it is empty
- Quickly stops minor bleeding without staining the other plasters
- Small dimensions - easy to find room for the QuickFix dispenser
- Includes a shelf for storing small, relevant objects
- Can be locked so that it can only be opened with a key

Your quick help for minor everyday accidents

Mount the plaster dispenser on the wall and save time.
Put on the plaster - and back to work!

QUICK AND HYGIENIC HELP WITH MINOR INJURIES
Stop wasting time on minor injuries. Take a plaster from the dispenser, put it on, and go back to work! QuickFix solves the problem easily, hygienically and effectively.

Lots of minor accidents happen every day at work where a plaster is all that is needed. Choose the right plaster for your work situation. A suitable solution is available whether you need plasters for common work situations, for workplaces with a lot of humidity or for work within the food sector.

Take the plaster from the dispenser.
It is ready for use...

... and can be put on
using one hand

Flexible system for all types of work

QuickFix provides a structured approach to first aid of minor injuries

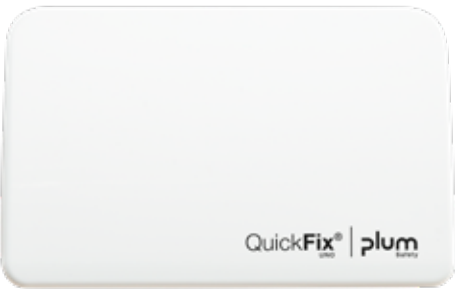

CHOOSE THE DISPENSER THAT BEST SUITS YOUR NEEDS
Our range of QuickFix plaster dispensers contain two types of dispensers in different designs. They are developed for different types of workplaces and they can be filled with plasters and ampoules of eyewash in a variety of mixes to meet the needs of every work situation.

QUICKFIX DISPENSER
The classic green QuickFix dispenser contains two refills of QuickFix plasters and/or QuickRinse eyewash ampoules. The green cap protects the content of the dispenser from dust and dirt from the workplace. It is designed with an inside shelf for smaller objects and it can be secured with lock and key.

The dispenser can be used in any location with risk of injuries and scratches. The dispenser is designed for mounting on any stationary workplace.

Dimensions: h: 135 x w: 230 x d: 32 mm

QUICKFIX UNO DISPENSER
For workplaces that are not challenged with dust and dirt, we have developed the QuickFix UNO plaster dispenser. It is a small and modern dispenser in a unique design that combines workplace safety with modern style.

The dispenser contains 1 refill of QuickFix plasters or QuickRinse eyewash ampoules.

QuickFix UNO is available with a glossy white or a transparent cover.

Dimensions: h: 85 x w: 130 x d: 35 mm

Choose your QuickFix plaster dispenser

- to meet your specific needs

QUICKFIX WATER RESISTANT

QuickFix plaster refills

Full overview of refill solutions

QUICKFIX ELASTIC REFILL
45 elastic and comfortable textile plasters that adjust to the movements of the skin. The plasters are skin-friendly and allow the skin to breathe.

REFILL
Display carton: 6 x 45
Packaging: 8 x 6 x 45
Article no: 5512
Dimensions: l: 72 x w: 25 mm

DISPENSER
Article no: 5502

QUICKFIX DETECTABLE REFILL
45 blue conspicuous plasters with a built-in metal foil that can be traced by a metal detector. Particularly suitable for the food industry. The plasters are made from a breathable material.

REFILL
Display carton: 6 x 45
Packaging: 8 x 6 x 45
Article no: 5513
Dimensions: l: 72 x w: 25 mm

DISPENSER
Article no: 5503

QUICKFIX WATER RESISTANT REFILL
45 water resistant plasters that are particularly suitable for working environments with a high level of humidity. The plasters are made from a protective PE material.

REFILL
Display carton: 6 x 45
Packaging: 8 x 6 x 45
Article no: 5511
Dimensions: l: 72 x w: 25 mm

DISPENSER
Article no: 5501

QUICKFIX ALOE VERA REFILL
The aloe vera contained in the pad has well known soothing, moisturizing and calming properties. It creates the best conditions for the wound environment helping the natural healing process. Prevents the formation of scabs.

REFILL
Display carton: 6 x 45
Packaging: 8 x 6 x 45
Article no: 5514
Dimensions: l: 72 x w: 25 mm

DISPENSER
Article no: 5506

QUICKFIX ALU REFILL
Plaster with micronized aluminum pad. The anti-adhering layer in aluminum and PE has a higher anti-adhering performance compared to a standard PE layer. The plaster is air-permeable and comfortable.

REFILL
Display carton: 6 x 45
Packaging: 8 x 6 x 45
Article no: 5515
Dimensions: l: 72 x w: 25 mm

DISPENSER
Article no: 5505

QUICKFIX BLOOD STOPPER REFILL
Plasters with hemostatic effect. The presence of alginate fibres between the nonwoven fibres of the wound pad creates an artificial clot (gel) inside the pad, which blocks the bleeding in 1-2 minutes and maintains optimal moist conditions.

REFILL
Display carton: 6 x 45
Packaging: 8 x 6 x 45
Article no: 5516
Dimensions: l: 72 x w: 25 mm

Content: 5 x 20 ml
Packaging: 4 x 5 x 20 ml
Article no: 5160

QuickSafe® gives you quick, easy and safe first aid

A flexible solution that gives a quick overview of the available first aid - and makes it easy to always have the right products in the right place

CUSTOMIZED FIRST AID STATIONS
 Fill your first aid station according to your needs. Eyewash for rinsing foreign bodies from the eye. Plum pH Neutral for accidents with acids or alkali. Plasters that are suitable for your work situation. Burn gel that soothes minor burns. Eyewash ampoules for minor accidents and irritated eyes. Wipes for cleansing wounds. Compress dressings for more serious accidents.

All of it behind a transparent cover that will give you a perfect overview of what you need.

” GET THE MOST IMPORTANT ITEMS IN THE RIGHT PLACE

Spæncom A/S is a leading supplier of concrete elements. The company has chosen Plum Quicksafe® in order to increase safety for their more than 500 employees. “We have chosen Plum Quicksafe®, because the station can be organized to suit the individual work area. In the areas where concrete elements are acid-washed, we can, for example, place Plum Eyewash and Plum pH Neutral DUO close to the work situation. QuickSafe® contains the most necessary items, it can be placed so that first aid is close at hand, and it is very practical with the transparent cover.”

Jany Johannsen,
 Environment and Safety Coordinator

QuickSafe® EMPTY

YOU MAKE THE DECISIONS
 If you want full freedom to organize your first aid according to your requirements, you can start with an empty station and fill it to suit your specific situation.

BUY AN EMPTY STATION AND FILL IT TO MEET YOUR NEEDS
 If you have requirements that we do not meet with the 4 different QuickSafe® solutions presented on the following page, you can get a 100% customized solution. Start with a wall station and fill it with eyewash bottles and other first aid products.

Packaging: 1
Article no: 5173
Dimensions: h: 430 x w: 253 x d: 92 mm

Help is at hand

Easy access to first aid is the key to increased safety

QuickSafe® collects the most important first aid products in one place. Position the station close to where the products are most likely to be used. The station does not take up much more room than an A3 sheet of paper, which means you can place your QuickSafe® exactly where it is needed.

The transparent cover gives you an overview and provides quick and easy access to first aid. You can easily see when the station needs a refill, and the dust-proof cover together with the separately packed products make QuickSafe® both a hygienic and an elegant solution.

The eyewash plan is included in all QuickSafe® stations

QuickSafe® BASIC

A GOOD STARTING POINT
With a QuickSafe® Basic you get the most essential products and can choose the contents for the top shelves. It gives you full flexibility.

DO YOU HAVE SPECIAL REQUIREMENTS REGARDING YOUR FIRST AID STATION?
The backbone of the entire QuickSafe® series is Plum's acclaimed eyewash. With QuickSafe® Basic you will get it in a combination with Plum pH Neutral, eyewash ampoules and plasters. The rest is up to you. Organize the shelf in the station to suit your company's requirements.
